Skydio

X10

Attachments

Modular by mission

With four attachment bays and support for payloads up to 385 g, Skydio X10 adapts to mission-specific requirements. Add Skydio attachments or integrate your own for communication, illumination, precision positioning, resilient connectivity, payload delivery, or operations over people.

Spotlight

Identify people and objects from hundreds of feet away with powerful onboard illumination.

Weight: 115 g

Connect Fusion+

Combine Skydio Connect SL with dual cellular links in a triple-link configuration for higher throughput and more reliable connectivity.

Weight: 85 g

Speaker

Communicate during tactical response, search, rescue, or incident operations.

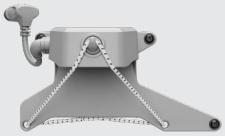

Weight: 100 g

Parachute

Meet flight requirements for operations over people.

Weight: 160 g

Dropper

Carry and release payloads up to 257 g above targeted areas.

Weight: 59 g

NightSense

Extend autonomous obstacle avoidance into the dark with visible or infrared illumination.

Weight: 57 g

RTK/PPK

Receive correction data from a base station to support high-precision geolocation.

Weight: 51 g
