

X100

Attachments

Modular by mission

With four attachment bays and support for payloads up to 385 g, Skydio X100 adapts to mission-specific requirements. Add Skydio attachments or integrate your own for communication, illumination, precision positioning, resilient connectivity, payload delivery, or operations over people.

Parachute

Meet flight requirements for operations over people.

Weight: 160 g

Speaker

Communicate during tactical response, search, rescue, or incident operations.

Weight: 100 g

NightSense

Extend autonomous obstacle avoidance into the dark with visible or infrared illumination.

Weight: 57 g

Dropper

Carry and release payloads up to 257 g above targeted areas.

Weight: 59 g

Spotlight

Identify people and objects from hundreds of feet away with powerful onboard illumination.

Weight: 115 g
